4 **Figure S1.** Temporal evolution of the six monitored soil properties during the three-year
 5 experiment (2009-2011) at the 0-30 cm soil depth. Standard errors are shown as ± 1 SE bars.
 6 C: control; DL: dolomitic limestone; SF: sugar foam. CaECEC, MgECEC, KECEC and
 7 AIECEC: Ca, Mg, K and Al saturation of the effective cation exchange capacity, respectively.
