Journal title

Authorship, good publication practice and copyright transfer statement

The Editors of the journal remind authors that the content of all manuscripts must be original and unpublished. Material published previously in whole or in part, or currently under review at another journal, will be accepted only if the reasons for the duplication are stated and a reference to the earlier article is provided. It will be the responsibility of the Editorial Board and the evaluation reports to determine the relevance of re-editing a work.

All authors of the article must have contributed to the design, performance and development of the study, and must also have contributed to obtaining the data, interpreting the results, and drafting and revising the manuscript. All persons who contributed to these tasks must be named as authors.

The author responsible for correspondence about the manuscript must complete the form below. All authors must complete and sign this form. The corresponding author must collect all authors' signatures on a single sheet or on as many copies of the sheet as are needed to obtain all signatures, and must attach the sheet(s) to the rest of the manuscript submission form.

The completed [form](#) must be submitted to the journal together with the manuscript.

Before submitting an article you should consult the [Good editorial practice guidelines](#) for CSIC Journals.

Editorial CSIC, the Publisher of this Journal, is a member of Similarity Check, a multi-publisher initiative started by Crossref to screen published and submitted content for originality.

Through Similarity Check, we use the [iThenticate](#) software to detect instances of overlapping and similar text in submitted or published manuscripts. All articles will be reviewed with this tool.

Title of the manuscript

Statement of originality and lack of prior publication (All boxes must be checked)

This manuscript is original and unpublished, and has not been nor will be submitted to another journal for consideration unless it is rejected.

None of the data presented in this manuscript have been plagiarized, fabricated, manipulated or falsified. All original data are distinguished clearly from previously published data.

All original sources upon which information in the manuscript is based, and all theories and data from previously published sources, have been properly identified and cited.

The sources of all previously published figures, tables, data, photographs, etc. in the manuscript have been cited, and all necessary permissions to reproduce them in any medium have been provided.

Permission has been obtained from all persons who provided unpublished data verbally or in writing, and all verbal and written communications are clearly identified as such and attributed to their author(s).

Statement of partial or total overlap (Check only those boxes that apply)

Parts of this manuscript have been published previously (Please provide relevant details below in the Comments box, along with the overlapping text.)

This manuscript is a translation of a previously published article and permission has been obtained from the publisher of the initial version. The secondary nature (translation) of this manuscript will be explicitly noted in the final publication. (Please provide relevant details in the Comments box below, along with the originally published text.)

Authorship (Both boxes must be checked)

All persons named as authors in this manuscript have participated in the planning, design and performance of the research, and in the interpretation of the results. In addition, all persons named as authors critically reviewed the manuscript, approved the final version and consent to its publication.

No person responsible for the manuscript and who meets the criteria for scientific authorship has been omitted from the list of authors.

Data collection and interpretation of the results (Both boxes must be checked)

All authors of this manuscript have avoided errors in the experimental or theoretical design, presentation and interpretation of the results. If any such errors are detected in the manuscript before or after publication, the authors will immediately alert the Editors.

The results of this study have been interpreted objectively. Any results that contradict the authors' point of view have been discussed in the manuscript.

Funding sources and acknowledgments (Both boxes must be checked)

All sources of funding provided for this study are acknowledged, with a concise mention of the funding organization and identification code.

All persons who contributed to the manuscript but who are not authors and who are not responsible for preparation of the manuscript are mentioned in the Acknowledgments.

Conflicts of interest (Check only if applicable)

In the Comments box below the authors provide information regarding any commercial, financial or personal relationships with people or institutions that might have an interest of any nature in the research reported in this manuscript.

Data Repositories (Check only if applicable)

Datasets obtained from the research developed in this article have been deposited in a repository.

Indicate the name and URL of the repository in the "Observations" section at the end of this document.

Authorization for the publication of the email (Check only if applicable - consult the Author Guidelines of the journal)

All persons who sign this work authorize the publication of their contact email in the article, as well as on the website of the journal.

We recommend the use of institutional type emails.

Copyright transfer and dissemination (This box must be checked.)

Authors acknowledge that publishing this manuscript implies the transfer of copyright to Editorial CSIC, which reserves the right to distribute the published version of the article on the Internet under the terms of use and distribution of a Creative Commons Attribution 4.0 International license. Distribution of the article in this manner ensures that authors are in compliance with current Spanish legislation (*Ley 14/2011, de 1 de junio, de la Ciencia, la Tecnología y la Innovación, artículo 37.3 (modificado en la Ley 17/2022, de 5 de septiembre)*) regarding the requirement to provide open access to research results obtained with funding from public research organizations.
